DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 37-44, and 48-57, drawn to a semiconductor device, classified in class 257, subclass 288.
- II. Claims 21-36, drawn to a method of forming a semiconductor device, classified in class 438, subclass 197.
- III. Claims 45-47, drawn to method of using a semiconductor device, classified in class 257, subclass 288.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the method of claim 21 can be used to make a materially different product from the device of claims 1-20 wherein there is no gate dielectric or gate electrode. The device of claim 48 can also be made by a materially different process from the method of claim 21 wherein there are a plurality of pixel devices created.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the

Art Unit: 2815

process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the method of claim 45 can also be practiced with a materially different product from the device of claims 1-20 wherein the channel includes thallium. The method of claim 45 can also be practiced with a materially different product from the device of claim 48 wherein there is only one pixel device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
